

Can't create files on the C drive of Windows 8 A required privilege is not held by the client

A required privilege is not held by the client when you try to create a file or folder on the c drive of Windows 8.

Do not turn UAC off from Windows 8 control panel.

Instead, go to registry and do the following:

1. Press keys "Windows Key + R", type regedit
2. Locate HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\Windows\CurrentVersion\Policies\System\EnableLUA
3. Update the EnableLUA value to 0 (turn if off)
4. Restart Windows.

Tested, works :)

Yet again, thanks Microsoft for a great OS!
