

How to change SSH port on cPanel Linux server

1. Login to the server through SSH (port 22 by default)
2. Type this command **vi /etc/ssh/sshd_config**
3. Press **"i"** on the key to enable editing mode.
4. Where it says **#Port 22** change to **Port 123** (for example)
5. Now pres **"esc"** button on the keyboard and type **:wq!** to save the file and press enter.
6. Now restart the SSHd service by typing **service sshd restart**
6. Done

PLEASE NOT: IF YOU HAVE A FIREWALL, OPEN THE CUSTOM PORT FIRST BEFORE EDITING, IT MAY LOCK YOU OUT
